

Abhishek G

Java Full Stack Engineer | Spring Boot | Microservices | Distributed Systems

✉ abhishek.g02112001@gmail.com ☎ 9844248690 📍 Bangalore LinkedIn: [abhishek-g-2001](#)

Summary

Backend-focused Full Stack Engineer with 1.5+ years of experience in Java, Spring Boot, and microservices. Worked on ISO8583-based payment systems and scalable banking applications. Skilled in REST APIs, Docker, Kubernetes, and distributed systems. Experienced in Agile SDLC and applying SOLID principles to build maintainable and scalable software.

Education

AMC college of Engineering BE • 8.52
Computer Science Bengaluru, Karnataka • 2020-2024

Experience

I-exceed technology solutions private limited Bengaluru, Karnataka
Software Engineer Oct 2024 - Present

- Architected and deployed 5 microservices using Java and Spring Boot for a payment processing system serving over 1,000 daily transactions.
- Integrated ISO8583-based payment systems, which improved transaction success rates by 15%, enhancing overall payment reliability.
- Designed multithreaded services that reduced response time by 30% and supported 500 concurrent users for a high- traffic banking application.
- Built REST APIs and automated financial workflows, reducing manual effort by ~40%
- Containerized and deployed applications using Docker, Kubernetes, and OpenShift, improving scalability and deployment efficiency
- Followed Agile SDLC and applied SOLID principles to develop maintainable and scalable microservices

Projects

Odisha Gramya Bank (Retail Banking Payments)

- Built ISO8583-based payment integration system for end-to-end transaction processing (~10k+/day)
- Implemented account statements and reporting workflows using JasperReports
- Implemented multithreading, reducing redundant API calls by ~30% and improving response time.

VALT – Corporate Banking Platform

- Developed REST APIs using Java & Spring Boot for corporate banking workflows and service integrations
- Designed scalable API architecture and developed multiple REST APIs to support corporate banking workflows and integrations.

Deutsche Bank

- Integrated microservices with Apigee API Gateway, improving API security and management
- Upgraded applications to JDK 17 & latest Spring Boot versions, enhancing performance and maintainability
- Containerized and deployed services using Docker, Kubernetes, and OpenShift for scalable environments
- Built multithreaded API integrations, reducing response time by ~20%

Société Générale

- Developed scheduler-based microservices for automated account statement generation and reporting
- Automated backend workflows, reducing manual effort by ~40% and improving efficiency

Skills

Languages: Java, SQL, JavaScript
Backend: Spring Boot, Microservices, REST APIs, Multithreading, Core Java, Spring Framework, Distributed Systems
Fintech: ISO8583, Payment Systems
Databases: MySQL, PostgreSQL
DevOps: Docker, Kubernetes, OpenShift
Tools: Apigee, Jasper Reports, Git
Frontend: React, JavaScript, jQuery
Practices: Agile (Scrum), SOLID Principles
Practical Skills: Problem-solving, Ownership, Debugging production issues

Awards

Most Promising Newcomer - I-exceed 28th April 2025
